

Northeast Region 2005 Visitor Survey Card Data Report

Introduction

To assist the National Park Service in complying with the Government Performance and Results Act (GPRA), a visitor survey was conducted in 321 units of the National Park System in FY05. The survey was developed to measure each park unit's performance related to NPS GPRA Goals IIa1 (visitor satisfaction) and IIb1 (visitor understanding and appreciation).

The results of the Visitor Survey Card (VSC) survey conducted at 58 parks in the Northeast Region are summarized in this data report. A description of the research methods and limitations is on the back page.

Below (left) is a graph summarizing visitor opinions of the "overall quality of facilities, services, and recreational opportunities" in units of the region. This graph compares FY05 data (shown in black) with a seven-year baseline data (FY98-04) shown in gray. The satisfaction measure below this graph is a combined percentage of "good" and "very good" responses. This is the primary performance measure for Goal IIa1. (The satisfaction measure may not equal the sum of "very good" and "good" percentages due to rounding.)

Below (right) is the FY05 GPRA reporting measure for Goal IIa1. The percentage included in the box should be used for reporting GPRA Goal IIa1 performance. The response rate for this region was 22%.

Overall quality of facilities, services & recreational opportunities

FY05: Satisfaction measure: 96%
Average evaluation score: 4.7

Understanding the Results

Inside this report are graphs that present the combined survey results for the region. The report contains three categories of data—park facilities, visitor services, and recreational opportunities. Within these categories are graphs for each indicator evaluated by park visitors. For example, the park facilities category includes indicators such as visitor center, exhibits, restrooms, and so forth. In addition, responses for indicators within each category are averaged into a combined graph for the category (e.g., combined park facilities).

Each graph includes the following information:

- the number of parks and visitor responses for the indicator;
- FY05 data (black), and baseline data (gray);
- the percentage of responses which were "very good," "good," "average," "poor," and "very poor;"
- a satisfaction measure that combines the percentage of total responses which were "very good" or "good;" and
- an average evaluation score (mean score) based on the following values: very poor = 1, poor = 2, average = 3, good = 4, very good = 5.

The higher the average evaluation score, the more positive the visitor response.

- graph percentages may not equal 100% due to rounding

FY05 GPRA Reporting Measure for Goal IIa1

Percentage of park visitors satisfied overall with appropriate facilities, services, and recreational opportunities:

96%

Northeast Region Park Facilities

Visitor Center

FY05: 58 parks; 4496 respondents

FY05: Satisfaction measure: 93%
Average evaluation score: 4.6

Exhibits

FY05: 58 parks; 4540 respondents

FY05: Satisfaction measure: 93%
Average evaluation score: 4.6

Restrooms

FY05: 58 parks; 3870 respondents

FY05: Satisfaction measure: 84%
Average evaluation score: 4.4

Walkways, trails, and roads

FY05: 58 parks; 4295 respondents

FY05: Satisfaction measure: 93%
Average evaluation score: 4.6

Campgrounds and/or picnic areas

FY05: 58 parks; 1435 respondents

FY05: Satisfaction measure: 85%
Average evaluation score: 4.3

Combined park facilities

FY05: 4540 responses (based on 5 indicators)

FY05: Satisfaction measure: 90%
Average evaluation score: 4.5

Northeast Region Visitor Services

Assistance from park employees

FY05: 58 parks; 4600 respondents

FY05: Satisfaction measure: 97%
Average evaluation score: 4.8

Park map or brochure

FY05: 58 parks; 4131 respondents

FY05: Satisfaction measure: 94%
Average evaluation score: 4.6

Ranger programs

FY05: 58 parks; 2685 respondents

FY05: Satisfaction measure: 95%
Average evaluation score: 4.7

Commercial services in the park

FY05: 58 parks; 2156 respondents

FY05: Satisfaction measure: 78%
Average evaluation score: 4.2

Value for entrance fee paid*

FY05: 58 parks; 3674 respondents

FY05: Satisfaction measure: 92%
Average evaluation score: 4.6

Combined visitor* services

FY05: 4600 responses (based on 5 indicators)

FY05: Satisfaction measure: 93%
Average evaluation score: 4.6

*Baseline data are not available due to the addition of the "Value for Entrance Fee Paid" question in the FY05 survey card.

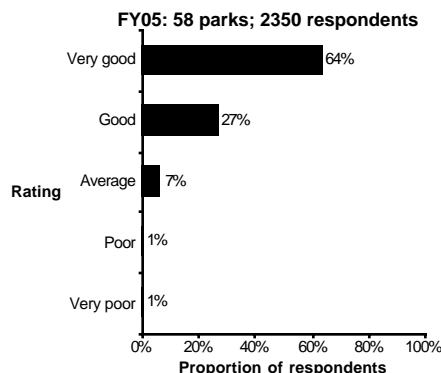

Northeast Region Recreational Opportunities

Learning about nature, history, or culture

FY05: Satisfaction measure: 95%
Average evaluation score: 4.7

Outdoor recreation*

FY05: Satisfaction measure: 91%
Average evaluation score: 4.5

Combined recreational opportunities

FY05: Satisfaction measure: 94%
Average evaluation score: 4.6

*Baseline data are not available due to the inclusion of "Sightseeing" in the Outdoor Recreation survey question.

Research Methods

Survey cards were distributed to a random sample of visitors in 65 units of this region during the periods from February 1- August 31, 2005. At each park, visitors were sampled at selected locations representative of the general visitor population.

Returned cards were electronically scanned and the data analyzed. Responses from individual parks in the region were combined into one dataset. Data from parks with less than 30 returned cards, or from park with discrepancies in the data collection methods, were omitted from this report.

Frequency distributions were calculated for each indicator and category.

All percentage calculations were rounded to the nearest percent. Therefore, individual percentages in each graph may not add to 100 percent. The response rate was calculated by dividing the total number of returned survey cards by the total number of survey cards distributed. The sample size ("N") varies from figure to figure, depending on the number of responses.

For most indicators, the survey data are expected to be accurate within $\pm 6\%$ with 95% confidence. This means that if different samples had been drawn, the results would have been similar ($\pm 6\%$) 95 out of 100 times.

The results do not necessarily apply to visitors during other times of the year, to park visitors who did not visit the survey locations, or to park units in the region that did not participate in the survey.
